Editor's View

"If we do not permit the earth to produce beauty and joy, it will in the end not produce food, either".— Josephwood Krutch

With a view of having a good habitat, we have come up with yet another new project what we call the '*Lalbagh Project*' as an effort to improve outlook towards the environment for making a safe future. We have done activities like rally, skit, clean-up, plant distribution and many more.

Some of the ways to conserve the environment through plantation & cleanliness, saving water, less usage of electricity, etc.

Cf conveys a **Note of Thanks** to all who have helped in making '*Lalbagh Project*' a grand success.

This issue is dedicated to Environment. We wish all our readers a very Happy World Environment Day.

Let's strive to have a great habitat!

Mother's Sacrifice and Love

Once a kid used to live with his mother. They were poor and could earn just to manage their needs. Mother had only one eye and because of that kid used to think as a matter of an embarrassment. One day when mother went to kid's school, everyone in school laughed at him and taunted about his mother having only one eye.

Due to this, the kid started to hate his mother and thought that his mother's presence is just an embarrassment for him and he didn't want to live with her. So, he decided that he would study really hard and will leave his mother. Kid completed his studies with good grades and landed a good job in another city. He left his mother and got settled in the city. He bought a big house, got married and had kids. He was living a happy successful life. There he had nothing to remind him of his mother and embarrassment caused because of her.

One day his mother came to see him. When kids saw her, they felt scared and went to him. When he came to see who was at their door he found that it was his mother.

Seeing her, he said. "who are you? How dare you come to my house?" Mother understood that her son didn't want to see her and quietly answered. "oh, I am so sorry. I may have gotten the wrong address." Then she just left.

She wrote:

My son,

I think my life has been long enough now. And... I won't visit you anymore... but would it be too much to ask if I wanted you to come visit me once in a while? I miss you so much. And I was so glad when I heard you were coming to the reunion. But I decided not to go to the school... For you... I'm sorry that I only have one eye, and I was an embarrassment for you.

You see, when you were very little, you got into an accident, and lost your eye. As a mother, I couldn't stand watching you having to grow up with only one eye... so I gave you mine... I was so proud of my son that was seeing a whole new world for me, in my place, with that eye. I was never upset at you for anything you did.

I miss you so much. I love you. You mean the world to me.

Moral:

Always Love and Respect your Parents as We can Never understand how much Parents sacrifice for us, we should Learn to Respect and Value their Sacrifice and Hard work., when Grown up kids should give Time and Care to their Parents.

The dreams are always much bigger than the resources available.

“Your life is pure joy, pure ecstasy, when you live in humanity” – Frederick Lenz

Ecstasy means an overwhelming feeling of great happiness or joyful excitement. Can a normal human being achieve ecstasy? The answer is the definite positive.

The simple ways to achieve the same are –

- ❖ Others before self – When we put others life ahead of life, happiness always springs. Look at the joy a mother enjoys when her child eats more than what she normally eats.
- ❖ Truth – “The best thing about the truth is, you don’t have to remember it”. When you are truthful, the mind won’t have any wrong or polluted or inferior thoughts.
- ❖ Training the mind – It is important to train the mind with positive thoughts so that even in adverse scenarios we can prosper. When a crow shits on you, thank God cows won’t fly.
- ❖ See good in everything – Be happy not because everything is good but because you can see good in everything.

“Keep choosing happiness daily, and happiness will keep choosing you back”.

EXAM MANTRA

-Extract from the Book 'Exam Warriors'

Mantra 5: Knowledge Is Permanent—Pursue It

The aim of learning is to gain knowledge. When knowledge is pursued, marks will automatically follow (as a by-product).

When you visit a doctor, do you ask for his or her college mark sheet? No, you trust doctor's skills to cure you. Such behaviour holds good for CA, Lawyer or any other professionals too.

It is the knowledge and skills you acquire that will matter.

The journey of acquiring knowledge is itself a rewarding experience.

Do it with passion or not at all.

Knowledge Sharing Stop

Word of the month: Hangry

Hangry—It's an adjective

Meaning-Bad-tempered or irritable as a result of hungry

E.g.: I get very hangry if I miss a meal.

Plant of the month: Lakshmi taru

Lakshmi taru also called simarouba. This plant consumes highest amount of Carbon Dioxide and purifies the environment and can help in reducing the heat. It requires very little water to grow.

Simarouba decoction is also used in traditional medicine in the treatment of cancer and tumors. Simarouba leaf decoction when taken in limited amounts can raise the immunity. This has anti-bacterial properties.

Did you know? Different color no. plates?

White number plates-Cars bearing black lettering on a white background are private vehicles.

Yellow number plate-Commercial vehicles such as trucks and taxis have a yellow number plate with black text.

Black number plate with yellow lettering-These are commercial vehicles available on rent for self-drive.

Light blue number plate-Vehicles belonging to foreign consulates bear white lettering on a light blue plate.

Number plate with upward pointing arrow-Military vehicles follow a unique numbering system.

Fruit of the month: Mango

The mango tree is native to South Asia. Mango fruit is the national fruit of India. Mango is a rich source of Vitamins A, C and D. The few benefits of mango are-

- Enhance skin health
- Can help treat kidney stone
- Regulate blood pressure
- Help prevent asthma
- Promotes brain health
- Improve liver health

Concept of the month: Lucky Latitude

This refers to the geographical region where the practice of domestication of plants and animals began to happen for the first time in human history. It includes land that lies between the latitudes of 20 and 35 degrees north in the old world, and 15 degrees south and 20 degrees north in the Americas. These regions became more favourable to the rise of civilization when the rise in earth's temperature ended the last Ice Age around 12,000 years ago. Consequently, people located in these regions gained a head start over the rest of the world.

App of the month: Monster messenger

Safe and fun messaging app to connect your kids with everyone they love. No SIM card required! Monster Messenger enables children and their relatives to exchange all their little daily signs of love and reinforcement that are so important to help children to grow up in harmony and confidence. Think all you speak but don't speak all you think!!!

A.P.J. Corner : Far-reaching

Technological strengths are the key to creating more productive employment in an increasingly competitive market place and to continually upgrade human skills. Without a pervasive use of technologies, we cannot achieve the overall development of our people in the years to come. Technology is important as well in combating the dangers posed by existing and newer forms of diseases.

Any nation aspiring to become a developed one needs to have strengths in various strategic technologies and also the ability to continually upgrade them through its own creative strength.
